

technical specification

Powerflow Flux

FEATURES

- * No Zinc Chlorides
- * Less corrosive
- * Water Soluble
- * Paste cream
- * Low melting point

BENEFITS

- * Penetrates rapidly
- * Not a liquid
- * Safe to handle
- * Cleans as it solders
- * Excellent capillary action

DESCRIPTION

Afrisol Powerflow Flux is a paste cream flux formulated specifically for the plumbing industry to be used with 97/3 lead free solder.

It contains no "Zinc Chloride" or any chloride based components that rapidly attacks copper/brass metals to form a hard corrive residue that is difficult to remove. In stead, Afrisol Powerflow Flux is water soluble before and after soldering and can be cleaned easily with water. It effectively cleans copper piping and promotes a very strong wetting action that spreads the solder easily.

APPLICATIONS

Water plumbing with S19 (97/3) solder.
Copper and brass soldering applications.
Radiator repairs.
Wire and foil tinning.
Repair work with solid solder wires.

AVAILABILITY

POWTUB050	50 gram tub
POWTUB075	75 gram tub
POWTUB150	150 gram tub
POWTUB200	200 gram tub
POWTUB300	300 gram tub
POWTUB500	500 gram tub
